Printable ring sizer

Print at 100% (“Actual size”, not “Fit to page”). Then check the two scale marks below before you measure.

1 Check the scale

This line must measure exactly 50 mm with a ruler.

A bank card should fit this outline exactly
85.60 × 53.98 mm

2 Method A — match a ring you already own

Lay the ring on the circles. Your size is the circle that sits exactly inside the ring’s inner edge. Between two? Take the smaller.

Size 13
UK Z · 22.2 mm

Size 14
UK Z+2 · 23.0 mm

3 Method B — strip sizer (cut along the dashed line)

Grey numbers = circumference in mm. Red marks = botthms sizes.

For an accurate reading

- Measure at the end of the day, when fingers are at their largest. Cold mornings read small.
- Measure the finger you will wear the ring on: left and right hands can differ by a full size.
- If your knuckle is much bigger than the base of your finger, choose a size between the two, closer to the base.
- Measure twice. If the readings differ by more than 1 mm, measure again.
- Wide bands feel tighter. Our men’s band is 8.7 mm wide; the women’s slim band is 5.7 mm.

Silicone fits snug: if you are between two sizes, choose the smaller. Your first size exchange is free within 30 days.

UK sizes follow British Standard BS 6820: size A is 37.8 mm round the inside, and each letter adds 1.25 mm. botthms sizes use US numbering. Shaded rows are the sizes botthms makes: men’s 7–14, women’s 4–10.
